

Evidence log

Keeps evidence ordered with source and date context.

PROCESSING BOUNDARY

Runs locally in your browser

PURPOSE OF THE SITE

This site exists to turn one question into a safe, repeatable research process. A tool result is not a verdict; the source and the human check stay visible.

WHY DID I BUILD IT?

I built this log so the source, observation time, and handling history of an item are not forgotten later.

SMALL ARCHITECTURE

Four parts from input to a record you can keep

Evidence log

USE IT STEP BY STEP

Step 1

Prepare the material

Start with: Evidence items

Step 2

Keep source, time, and handling in separate fields

Keeps evidence ordered with source and date context.

Step 3

Check the result against the source

Confirm that the hash, date, source address, and analyst note belong to the recorded item. Do not present later information as the first observation.

Step 4

Download and keep the record

Keep this at the end: An ordered evidence list

HONEST BOUNDARY

This log is not a forensic evidence management system. It cannot correct a wrong source entry or create legal validity by itself.
