

Web archive review

Shows the archived versions of a URL on a timeline.

PROCESSING BOUNDARY

The query goes through a server proxy

PURPOSE OF THE SITE

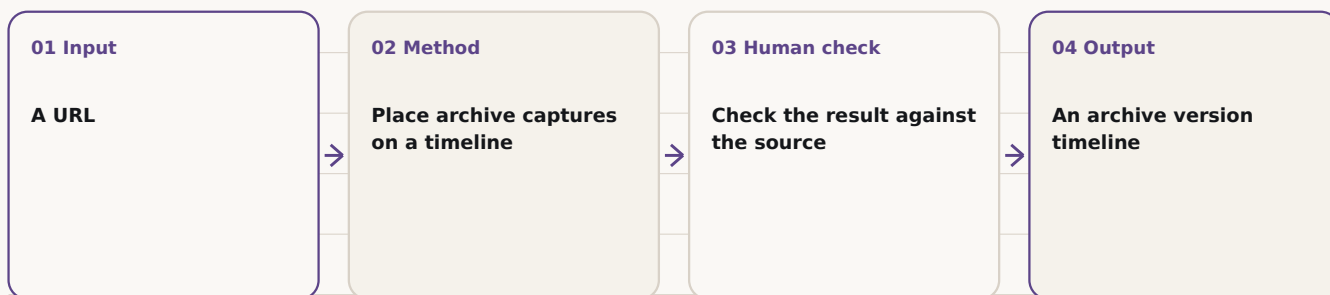

This site exists to turn one question into a safe, repeatable research process. A tool result is not a verdict; the source and the human check stay visible.

WHY DID I BUILD IT?

I built this to compare archived versions of a removed or changed page in date order instead of relying on one screenshot.

SMALL ARCHITECTURE

Four parts from input to a record you can keep

Web archive review

USE IT STEP BY STEP

Step 1

Prepare the material

Start with: A URL

Step 2

Place archive captures on a timeline

Shows the archived versions of a URL on a timeline.

Step 3

Check the result against the source

Check whether a capture loaded fully, which resources are missing, and the archive date. Do not confuse archive time with original publication time.

Step 4

Download and keep the record

Keep this at the end: An archive version timeline

HONEST BOUNDARY

Archive services do not preserve every page or resource. A missing capture does not mean the content never existed.
