

Web evidence recorder

Captures a page as evidence together with its date context.

PROCESSING BOUNDARY

The query goes through a server proxy

PURPOSE OF THE SITE

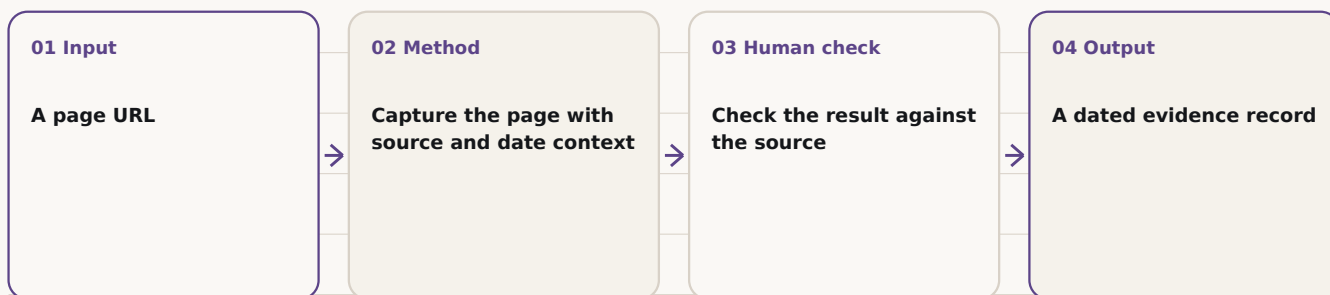

This site exists to turn one question into a safe, repeatable research process. A tool result is not a verdict; the source and the human check stay visible.

WHY DID I BUILD IT?

I built this recorder to keep the visible page, time context, and source address together before a web page changes.

SMALL ARCHITECTURE

Four parts from input to a record you can keep

Web evidence recorder

USE IT STEP BY STEP

Step 1

Prepare the material

Start with: A page URL

Step 2

Capture the page with source and date context

Captures a page as evidence together with its date context.

Step 3

Check the result against the source

Compare the recorded title, address, and visible content with the source page. Note that one capture may not show the whole page.

Step 4

Download and keep the record

Keep this at the end: A dated evidence record

HONEST BOUNDARY

A capture is not notarization or a forensic image. It cannot preserve every signed-in, personalized, or late-rendered element.
